

Don't get left in the dark

Emergency jump leads from GYS are available offering capability of 200A up to 700A and are colour coded for ease of use. Also new is a range of LED jumper cables to light up the situation in dark conditions.

A 300A version has a three metre cable and a 500A has a 3.5 metre stretch. The integrated lights will allow the user to see the coloured clamps easily, avoiding the risk of attaching the wrong cables and causing damage.
