

GYS – BATTERY CHARGER

New from GYS is the GYSFlash 7A advanced battery charger that is designed to take maximum care of all modern battery types including GEL and AGM/Start-Stop. The product uses a 10 stage microprocessor controlled charging curve to ensure an effective charge is achieved without risk to the battery. The product is safe to use whilst the battery is connected to the vehicle and can be left connected indefinitely.

The product features convenient LED indicators to display state of charge, robust and weatherproof plastic casing and weather proof design. The GYSFlash 7A will charge 12V batteries up to 130Ah, maintain batteries up to 230Ah and is suitable for use with Lead Acid, GEL, Silver/Calcium, AGM/EFB and Start Stop batteries.
