

## NEW FROM GYS

### GYS SMARTmig 110 welder

The SMARTmig 110 is a lightweight, portable and gasless MIG welder. As with other welders in the SMARTmigs range, it features the innovative SMART control panel that simplifies selecting the correct welding parameters to just three simple steps. Once the user has identified the metal type, thickness and wire diameter, the panel will indicate the correct settings that need to be set by adjusting the rocker switch and rotary dial. With a maximum capacity of 110A, the SMARTmig 110 welds 0.9mm wire and comes supplied with a fixed torch and earth clamp for £225 + VAT.

### GYS Spot Lift 3T mobile hydraulic vehicle lift

GYS is renowned for its welding machines and battery chargers, but is now a mobile hydraulic vehicle lift to its range. The heavy-duty Spot Lift 3T is a robust unit capable of lifting up to 3 tonnes, offering enhanced access to vehicles while providing a safer and more comfortable working position for mechanics.

A fully mobile unit that can easily be transported where it is needed, it requires only an external air supply. The Spot Lift 3T is manufactured to the highest standards at GYS in France. For further info, visit [www.gys.fr](http://www.gys.fr)
