

GYS – NEW EUROPEAN LOGISTICS CENTRE

GYS have continued their investment in the future, with the development of a new 6M, purpose built, 105,000 square feet (9,750 square metre) distribution facility, close to the main production site in Laval, France. The 6 hectare site was secured, and building commenced in September 2018, with the new European Logistics Centre being completed, and operational in January 2020.

GYS is already the largest manufacturer of inverter welding equipment in Europe, the new logistics centre reflects this expansion and will also allow future growth.

Bruno Bouygues, President and CEO of GYS commented: "This investment from GYS is very important for the future as it will enable us to store and to ship welding equipment, accessories & consumables faster throughout Europe and the UK. To our knowledge, it will be the largest logistics centre in Europe for Welding & Cutting machines."

GYS

With 750 employees located in 5 countries and a 2019 consolidated turnover of 97M (US\$ 108M), GYS is a family-owned company that manufactures welding & cutting products as well as battery charging equipment.
